CIF SINGLE CHIP SC-120 I  
couldn't find anything related to the  
driver, so does anyone knows how  
to install the driver for that? A: You  
need to download the CIF\_SC  
Driver from I can confirm this is  
the only working version for the  
device. Q: Find all of the values of  
 $a$  in the following quadratic  
equation. Find all of the values of  
 $a$  in the following quadratic  
equation.  $2x^2 - 7ax + 6a = 0$   
A: The only real solution is  $a=0$   
Solving the quadratic equation, we  
get:  $x = \frac{7}{2} \pm$

---

$\sqrt{\frac{49}{4}}$  Therefore  $a=0$ . A: Multiplying the equation by  $x$  gives  $2x^2-7ax+6a=0$ , which can be rearranged to  $(x-3a)^2=0$ . The only solution to this is  $x=3a$ , which means  $a=0$ .

A:  $2x^2 - 7ax + 6a = 0$  implies  $x^2-3ax+2a=0$  Hence  $a=0$  Q:  
Return a string from a function in Python I need to return the value of a string from a function. I want to define this function outside a class for any subclass. class myClass(object): def string\_function(self): #here i will
