f4bc01c98b Reply: Unfortunately,
I couldn't find the cause of these
weird errors, but I have some
ideas. I think it has to do with the
fact that I am using several
different servers sharing a
common database. I'm using
Apache Tomcat, but I also have
several different instances set up

in separate containers. So I think I need to add a column to the database to indicate which container the instance is for, so I can display the names correctly.
