Key-Macro is a powerful tool that allows you to write, or modify, text in a rich text control. This is made possible because Key-Macro uses Windows Rich Text Engine (RTE) – an advanced, visual component for writing, editing, and formatting text. Use Cases -- Allows you to type text, numerals, or symbols in a rich text control using the keyboard. -- Allows you to write a text string to the rich text control using a macro. How to use it: When opening the tool, Key-Macro will open a blank text box. To create a new Key-Macro, place the cursor in the text box, right-click, and then choose "New." This will open a new blank text box. Then, select a shortcut from the drop-down menu on the right-hand side of the new text box. This will set your shortcut for the macro, and allow you to switch back to the new shortcut whenever you want to write a new macro. Now, you need to add text to the text box. Any text you type in this text box will be displayed in the rich text control. You can insert many different characters in the text box. In the "New" tab, you can add text to the text box by clicking on the "Add/Edit" button. This will open the "Add Text" dialog box where you can insert text. Then, in the "Edit" tab, you can type text in the text box. You can edit the text in the text box by typing in it, as well as by using the tools in the right-hand toolbar. The tool also allows you to insert images into the text box. You can create a new image by clicking on the "Add/Edit" button on the "New" tab. To edit images in the text box, you can drag them onto the text box using the mouse, or you can use the tools on the right-hand side of the text box. Once you are satisfied with the text box, you need to save your work. To do this, click on the "Save" button on the right-hand side of the text box. This will open the "Save" dialog box. Select the location to save your work, and click on "Save." The next time you open the tool, you can click on the "Open" button on the "New" tab, and it will open the text box. Then
