There are many programs on the Internet that can help you convert your favorite pictures into CNC files, but some of them don't provide the option to choose exactly the dimensions that you want to create, other programs are generally simple to use, but are not very effective, or provide additional features, but they are not easy to use. This one of the reasons for which we created this app, I am sure that many of you have created CNC files in the past by manually tracing your favorite pictures, creating many limitations that CNC files will overcome. As for this, our main goal is to create a very easy way to create high quality CNC files from your favorite pictures, which is where the Image Importer's app comes into existence and allows you to transform your favorite photo into a CNC file in a short amount of time. In addition, we gave much importance to the fact that we included a number of features that generally doesn't exist in similar applications. The main features of our app include: The ability to choose the dimensions, resolution, and resolution of the file. The ability to choose the angle of the piece, which is going to be the object of the CNC file. The option to not only use the entire picture, but also the frame of your favorite image. The opportunity to choose the type of tool you want to use in the file. Generate the CNC file according to the above specifications. A very simple layout to help you manage your files. The ability to save your files to the SD card. And last but not least, you also have the ability to choose the name and format of your CNC file to finally create your own high quality files. In order to provide you the best possible service, we included a test mode for testing and an evaluation version. Please try our app and I am sure you will like it.
