Protect NSF files for free and easily, and access it with all popular Notes clients. Scan for NSF or ODS files, remove local security, and open NSF files. There are two methods to remove the restrictions to NSF files: Delete the Local Security Groups from the Notes Administrator and remove the security from NSF files. NSF Local Security Removal has been tested on the following official Lotus Notes clients and found to be compatible with them: Remove the restrictions and lose local security settings of NSF and ODS files That is to say, they are not required and

the removal is done manually. This method is provided here to be used when you want to have the ability to protect NSF and ODS files. If you want to follow a manual way to remove the restrictions, click the following link and follow the instructions. Remove Notes Local Security Setting If you are interested in the local security of NSF files and just need to remove it, then the following link can be used. Removal of Notes Local Security The method is not found to be as hard as the removal of the restrictions that prevents NSF files from being opened, since they have to be removed one by one. The approach begins with checking the current security settings to find out

the local security IDs, then proceed to remove these restrictions manually and finally, verify that the file is now not being protected. The process is quite easy, but the end result may be slightly time-consuming. Finding the local security IDs of NSF files To find the IDs of the local security, use the following method. Login to Notes as an Administrator and then open the Notes Folders node. Using the Options item of the Files item, navigate to the Documents folder and then open the File Settings item. Create a new folder and choose the Local Security option in the following list. Click Local Security Groups to view the details of the local security and find out

the IDs. How to remove the restrictions from NSF and ODS files manually This method will work with all types of NSF files. Go to the Notes folder you want to access and open the Notes application. Then, click on the New Notes Document node. After the document opens, select the Files tab and then the Open dialog. Use the Browse option to open the Folder window and navigate to the file you want to open. Once
