Axonal transport of the benzimidazole anthelmintic anisomycin in the optic nerve of the rabbit. The axonal transport of the benzimidazole anthelmintic anisomycin in the rabbit optic nerve was examined by intraocular injection of 5 mg/kg. Tritiated anisomycin was found to be incorporated into the whole nerve in a wide distribution. However, its greatest accumulation was in the area of axon terminals in the superior colliculus. This distribution indicates that the benzimidazole anthelmintic anisomycin was taken up through the terminals of optic axons and transferred along the axon to the superior colliculus. The titer of radioactivity found in the superior colliculus reached a peak 4 h after injection, at which time anisomycin remained detectable for at least 16 h. In contrast, a peak in the radioactivity titer in the visual cortex was not detected until 12 h and was of a similar magnitude to that detected in the optic nerve. The rapid transport of anisomycin into the superior colliculus suggests that the benzimidazole anthelmintic anisomycin may affect neurotransmitter release or receptor mechanisms at the neuromuscular junction.

Here, you can choose the type of file/directory you want to analyze. Here, you can choose if you want the type of file or directory to include meta data or not. New Window : As you can see, I already added a new file and directory. The file is included in the list of files, and the directory is included in the list of directories. Let's see the window for the evolution of the file/directory : As you can see, I just added a new version (file 2). The file is included in the list of files. I don't really need the meta data at this moment, so, I'll delete it. Add a new version for the file/directory : As you can see, I just added a new version (file 3). The file is included in the list of files. I'll select it to include meta data. Here, I'll leave the old version of the same file/directory, and select the new version. I'll then have to make a comparison to check the evolution of that file/directory. Select the old file/directory : As you can see, I already selected the old version of the file/directory. I'll select the new version. I'll
