I want to change it according to a specific row value in a table. For example, if the value of row "A" is 100 and I change the value in "A" to "90", I want the table to change to 90 and 100 according to that value. I can't find anything online that can help me do this. Any suggestions You are correct - what you want to do is not possible with Excel/VBA.
