History AutoCAD's history began in 1962 when Dennis B. Montgomery, a graphic designer and draftsman, was inspired by the Stanford Research Institute's Sketchpad, developed in 1955. Montgomery authored the first revision of the AutoCAD application in 1967. Montgomery's AutoCAD version 1.0 was developed using Borland's Pascal for the first time, with Borland releasing AutoCAD in 1986. This version of AutoCAD, after years of development, was the first version of AutoCAD that had its own, native file format. AutoCAD was sold in 1989 for \$3,000 (equivalent to \$4,150 in 2015). The version 1.0 release of AutoCAD was one of the first major releases of software, with a sales force that took the product on the road to support customers. AutoCAD had been released as a beta product and support was also provided to registered beta users. Autodesk was founded in 1986 by the MIT-trained software engineer Ben Shneiderman, who worked for William Gates III to develop Windows 1.0. Shneiderman was an expert in user interface design and he knew that a computer could do anything a human could do. Shneiderman and his wife then made a trip to Paris where they saw a graphic design system with a flowchart interface called HyperStudio. They asked Shneiderman to become the technical director of Autodesk. Ben Shneiderman retired from Autodesk in January 1998 and started a consulting firm 5b5f913d15
