This game is fun for adults and kids alike and lets kids create their own games by using blocks. With the advent of modern technology, a great many online games have been made available to the masses, with some being very elaborate and others being incredibly simple and kid-friendly. Roblox, a fun online gaming platform developed by Disney Interactive, is one such modern gaming platform, and the website is entirely suited for kids because it is free to use and parents can add as many blocks as they wish to create their own games. Once the game is created by the parents, the kids and can play it in a safe and secure environment by creating the games themselves. If the website has a videogame, these games can be played in your browser as Flash Games, or on a computer as an HTML5 Web Game. More than just an online gaming platform, Roblox has really entered the online gaming market by providing a social gaming environment that is easy to use and can be accessed by kids from all around the world. The website of Roblox.com allows children to build their own Roblox games using the blocks that are available in the game. The game development takes place in the computer, and the results of the build can be viewed in the computer's window. However, the process of building the game is not as difficult as it might appear to be. All you need to do is click on the "Block" button at the bottom right-hand corner of the window. Once you click on the block button, a computer code will pop-up, which you need to type in. The codes needed can
