The error come at this line : `var value = field.GetValue(obj);` in the method above. If I change `obj` to `type`, it will work. Is there any way that I can fix this problem? A: You can create your own exception and throw it using this exception. `public class MyException:Exception { public MyException(string msg){ this.Message = msg; } }` Next, rewrite the method like below, `public static String GetFieldValue(object obj, string prop) { var type = obj.GetType(); var field = type.GetField(prop); var value = field.GetValue(obj); if (`
